SHOW VILLAGE

International Builders' Show Exterior Products & Solutions

The latest in building science is on display at *Professional Builder Show Village 2013*. From beautiful, energy-efficient windows and sliding doors to siding and moisture management systems, Show Village is the place to see all of these products within the context of a built environment. Browse these products to learn more. **Better yet, see them in person. They are on display at *Professional Builder Show Village 2013* located outside the main entry of the Las Vegas Convention Center at the International Builders' Show held Jan. 22-24.**

[BASF](#)

The BEYOND program is scalable and adaptable for homes of all sizes and climate conditions.

[Benjamin Obdyke](#)

HydroGap® Drainable Housewrap from Benjamin Obdyke combines a water-resistant barrier and drainage system into one application.

[Bio-Microbics, Inc.](#)

Wastewater treatment systems (MicroFAST® or RetroFAST®) are an ideal treatment unit for the Infiltrator® IM-1060 septic tank.

[CarraraFinishes™](#)

CarraraFinishes™ build on LP® SmartSide® evokes old-world heritage and master craftsmanship.

[Environment One Corporation](#)

Sewer Anywhere and Save with E/One - the environmentally sensitive, economically sensible way to go!

[The Foundry](#)

The Foundry provides the authentic look of cedar shakes, shingles or hand-cut stone, without any maintenance worries.

[Generac](#)

Generac's market-leading Guardian® Series backup power systems automatically supply electricity to homes during an outage.

[Huber Engineered Woods, LLC](#)

ZIP System® roof and wall sheathing offer structural panels that eliminate housewrap and felt.

Hurd Windows & Doors

Hurd aluminum clad wood casements feature Ultra-R glazing with Heat Mirror suspended film for leading energy performance. DP50 Standard.

InSpire Roofing Products

InSpire roofing delivers the beauty of slate and cedar, sustainability and affordability.

Kohler Generators

An automatic standby generator by Kohler delivers added security and convenience in the event of a power outage.

LP Outdoor Building Solutions

Innovative products for premium outdoor structures that look great and stand up to the elements.

LP SmartSide

It's more than a job. More than a structure. It's a home.

Maze Nails

Maze offers a full line of specialty nails in bulk for hand driving and in collated sticks and coils for popular pneumatic nailers.

Mid-America Siding Components

Mid-America Siding Components turn a house into a warm, inviting home.

MoistureShield® Composite Decking

Choose from a variety of beautiful, durable MoistureShield® composite materials to design your outdoor living space.

Nissan Commercial Vehicles

Nissan designed more than a van. They designed a new way of doing business.

Nyloboard, LLC

A New Generation of NyloDeck: The "Non-composite" Composite - No Wood. No PVC. No Worries.

Pella Windows & Doors

Pella® 350 Series vinyl double-hung windows feature an exclusive energy-saving system, including triple-pane glass.

Roseburg

You can build a higher-quality home with the Roseburg Framing System.

Sherwin-Williams

Unsurpassed performance with a smooth, beautiful appearance and exceptional hide, durability and washability.

Solair® Shade Solutions

The Solair® Pro retractable awning provides a cost-effective upfit for adding shade and living space.

Sprint

Break new ground with the next generation in push-to-talk. Make sure the work gets done on schedule and within budget with the next-generation network.

Designed and built by:

Arlington Heights, IL (January 10, 2013) — For the 14th year, *Professional Builder* magazine presents the annual Show Village exhibit at the International Builders' Show (January 18-24). The magazine partnered with modular home manufacturers Palm Harbor Homes and IronTown Homes, along with Greenfab, a developer of sustainable, healthy, modular homes and communities, and more than 40 building product manufacturers to build three model homes — 2,072-sq-ft Aurora, 2,300-sq-ft Admiral and 918-sq-ft BASF High Performance Net Zero Home.

International Builders' Show attendees at the Las Vegas Convention Center will have the opportunity to tour these homes at the Show Village exhibit. The homes are designed for energy efficiency and to appeal to all homeowner prospects. The Aurora is a modern, all-electric home that maximizes space and energy efficiency. The Admiral is a Craftsman-style home designed to accommodate large, multi-generational families, with a guest suite featuring wider doorways for wheelchairs and a large roll-in shower. The BASF Beyond High-Performance Net Zero Home is built to achieve at least 50% more enhanced energy performance than in code-built homes — a high-performance home of the future.

The three models present builders with the opportunity to see new products and technology in a demonstration-type setting. Show Village attendees can tour the homes, test the products and talk with the sponsor manufacturers' representatives.

Each of the homes is designed and built to achieve certification through national and regional green home rating programs, and Greenfab has submitted the Aurora and Admiral homes for LEED Homes Platinum certification. Sustainable features include triple-pane, low-e windows; non-ducted mini-split heating systems; and wall-mounted radiant heaters. Show Village homes are on display throughout the January 18-24 International Builders' Show. Traditionally, at the show's conclusion, the homes are sold and moved to a residential lot.
